

## **PRESCHOOL & KINDERGARTEN**

REAP International is very proud to offer a program for Pre-School and Kindergarten students. Children benefit from an early education system in nearly exponential ways. Preschool-aged children need stimuli, encouragement, and structure. At this age, their minds are natural sponges as they absorb everything! Best practices show that there are substantial differences between the success of adults who attended a preschool program as children versus those who did not. With a preschool curriculum, our goals are to replicate this experience at home.

Our program is an age-appropriate early learning program designed to educate young children, prepare them for Kindergarten and First Grade, and offer high-quality learning experiences that include interactive offline and online activities.

# ENROLL IN PRESCHOOL & KINDERGARTEN TODAY!

## Language Arts

Language Arts helps children discriminate the sounds of the English language; blend sounds to make words; say, read, and write the letters of the English alphabet; discuss stories read aloud; communicate basic needs; use appropriate vocabulary in conversation; develop an appreciation for literature; learn about story elements; and role play characters.

Students will also cover phonemic awareness, phonics, fluency, and text comprehension during the kindergarten year of learning. This course will lay a strong foundation for beginning readers and writers.

**REAP INTERNATIONAL**  
**K12 SCHOOLS**

Instruction is organized in themed units around these courses.

## Math

Math will help children learn how to count and write numbers up to twenty, investigate sets and patterns, identify basic shapes, analyze pictographs, develop number sense, and solve simple math problems.

## Music

Music experiences include hands-on engagement, such as clapping to a steady beat or using rhythm sticks and on-screen music activities in a digital environment.

## Art

In our Art class, children explore art, observe and discuss works of art, describe similarities and differences in art, follow instructions, and apply different techniques to create original artwork.
