### **College Prep Genius Becomes Curriculum Partner with REAP K12 Schools**

FORT WORTH, TEXAS – REAP K12 Schools is pleased to announce that College Prep Genius is an official sponsoring partner for the 2023-2024 school year. This year, nine high school students were on track to take the SAT for their first time. Additional academic support was sought to better prepare these students and College Prep Genius decided to donate nine subscriptions, for the school year, to prepare these students.

Jean Burk, President of College Prep Genius shared, “I am impressed with the mission and vision of REAP K12 Schools. I wanted to ensure that the first high school students, in this international school, were prepared for their future.”

On May 6, these nine students took the SAT for the first time. There was one senior and eight junior students who took this assessment. The senior scored a 1180. Four of the 8 juniors scored higher than 900 with an average score, for all students, of 952.

REAP K12 Schools Vice President said, “Our students would not have achieved these incredible scores without this supplemental program. We are excited about this partnership and the future of our students.”
