Newman International Academy Earns National Gold Medal Math Award

FORT WORTH, TEXAS – On May 1, 2022, REAP K12 Schools were informed that the Newman International Academy, located in Vietnam, has been selected for the 2022 Gold Medal Math Award from Ascend Math. This is the third consecutive year that Newman has earned this honor. Only 37 schools, in America, received this award.

In a statement released by Ascend Math, “During the 2021-2022 school year, students and teachers worked hard to fill skill gaps. Many of the Ascend Math schools reported growth on high stakes tests and most students gained from 1 to 3 levels in Ascend Math!” Newman International Academy of Vietnam used the program to successfully teach math to students in elementary through high school classrooms.

Ascend Math officials continued by saying, “The over 5,100 students in our 37 Gold Medal schools have completed more than 71,000 objectives this year! Each Gold Medal school implements Ascend Math in their own unique way and yet all schools achieved great success in fulfilling their bold goals.”

Dr. Dan Dang, Executive Vice President of REAP International shared, “We are honored to receive this award. Our teachers are committed to the academic success of our students. Even with the struggles that COVID caused over the past year, our students continued to perform at high levels.”
